

PETROVANTA

Fueling Global Industry

Company Profile

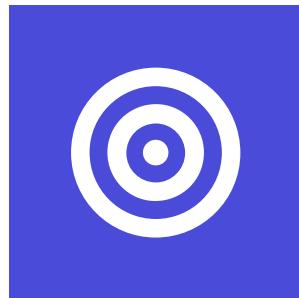

About Petrovanta

Petrovanta is a distinguished international commodity trading company headquartered in Dubai, UAE, with a strategic European presence in Frankfurt, Germany. We specialize in the sourcing and efficient delivery of a comprehensive spectrum of products essential for global industry, including petroleum, petrochemicals, chemicals, polymers, and fertilizers. Our strength lies in our robust network of reputable producers and our seasoned team of trading and logistics professionals. We bridge supply and demand with reliability and precision, navigating the complexities of the international market to deliver value and build lasting partnerships based on trust and mutual success.

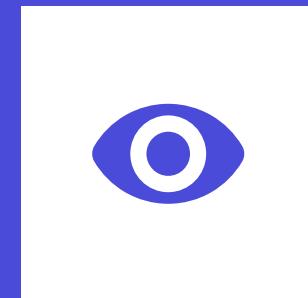

vision & Mission

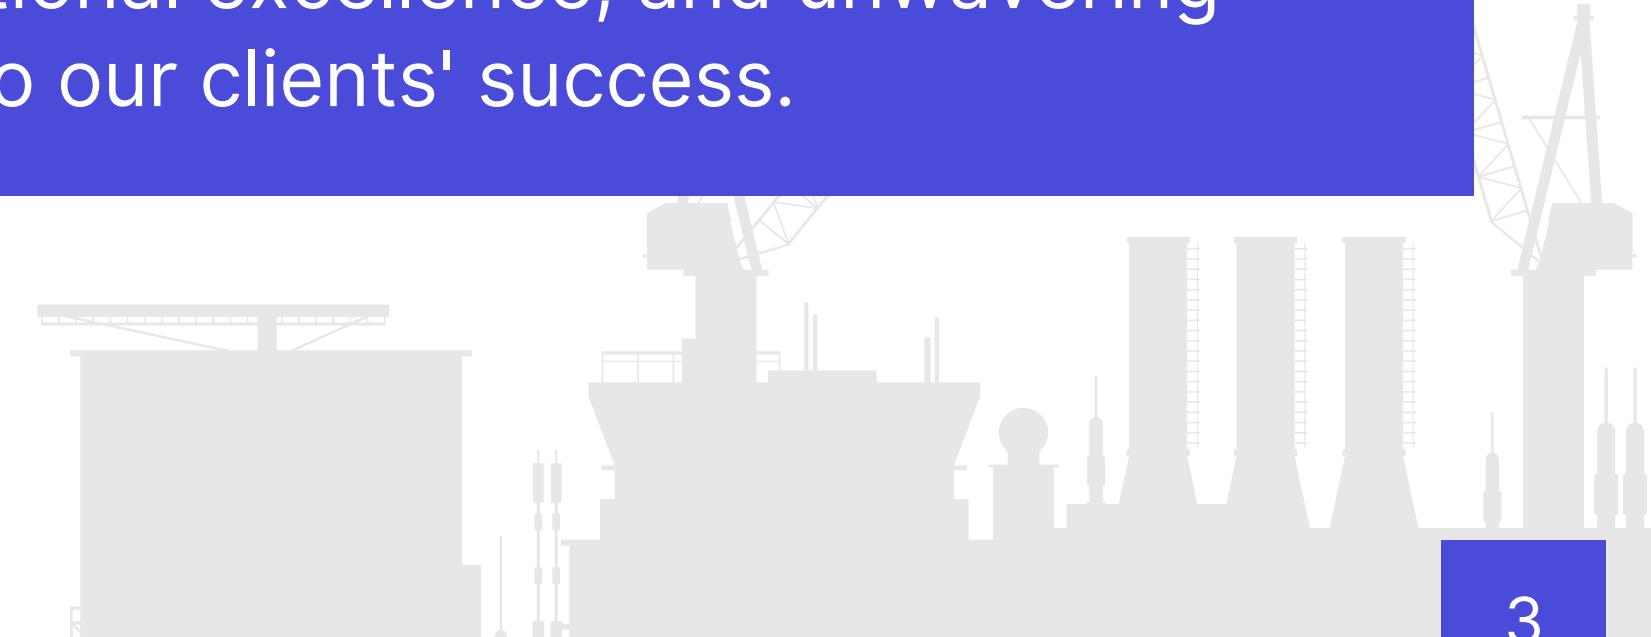

Our Mission

To provide clients with competitively priced products that deliver exceptional value, ensuring just-in-time deliveries through transparent, reliable, and efficient trading practices.

Our Vision

To be one of the global trusted providers of high-quality commodities, recognized for our market insight, operational excellence, and unwavering commitment to our clients' success.

Our core values

RESPECT

To succeed together through collaboration and mutual respect.

HONESTY

To operate with unwavering integrity and build trust through transparency.

QUALITY

To sell only products we can be proud of, adhering to the highest standards.

STRATEGY

To understand market trends and position ourselves and our clients ahead of competitors.

A Message from Our MD

Welcome to Petrovanta.

In a dynamic global market, the need for reliable and strategic commodity trading has never been more critical. At Petrovanta, we are built on the promise of not just meeting this need, but exceeding it. Our team of dedicated professionals works in concert to ensure our clients receive the highest quality products, backed by strategic insights and flawless logistics. We believe in building sustainable relationships founded on trust and a profound sense of responsibility. Thank you for your interest in Petrovanta. We look forward to partnering with you and contributing to your success.

Sincerely,

Shereef SaadEldin

Chief Executive Officer, Petrovanta

PETROLEUM PRODUCTS

We supply a vital range of petroleum products that power economies and build critical infrastructure worldwide. Sourced from leading global refineries, our products meet the highest specifications for quality and performance.

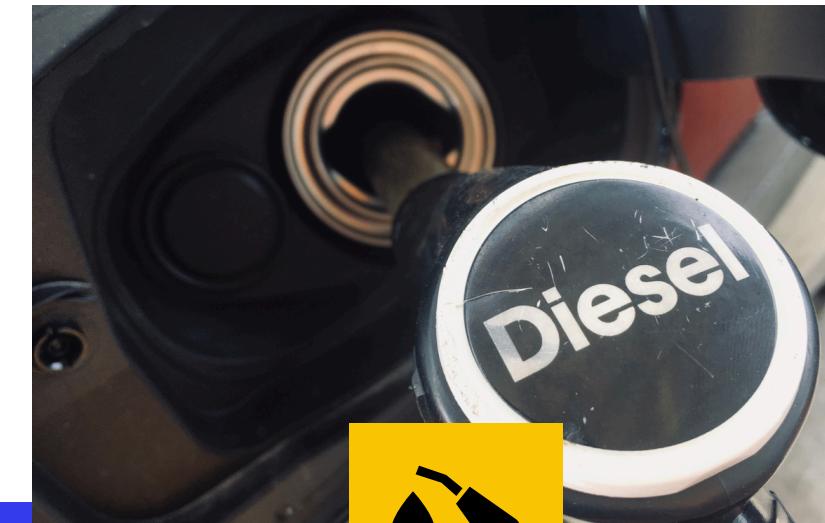

Crude Oil

The primary raw material for the petroleum industry, refined into various fuels and feedstocks. We source multiple grades to meet diverse industrial and refining needs.

Jet A1

A high-quality aviation turbine fuel with a high flash point, designed for the safe and efficient operation of commercial and private jet aircraft worldwide.

EN590 10ppm Diesel

An ultra-low sulfur diesel (ULSD) fuel meeting stringent European standards, designed for modern diesel engines to ensure efficiency and reduce emissions.

Bitumen

A viscous, black hydrocarbon product used as a binder in asphalt for road construction and for various waterproofing and roofing applications.

PETROCHEMICAL PRODUCTS

We supply key intermediates and industrial chemicals that are fundamental building blocks for consumer goods and industrial applications.

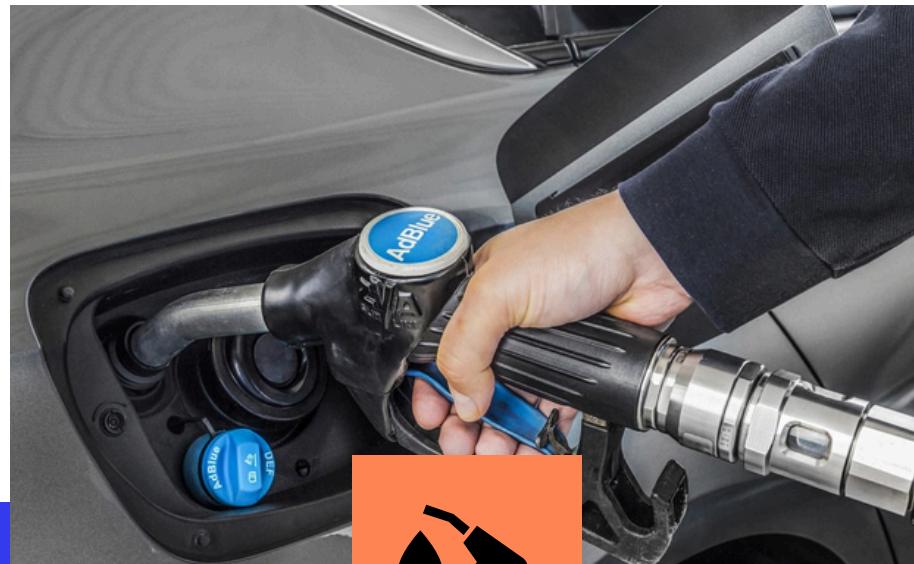

Base Oil (Groups I-IV)

The foundational component of most lubricants. Base oils are refined crude oil products used to manufacture motor oil, industrial lubricants, and greases.

Paraffin Wax

A versatile petroleum wax with excellent water barrier properties, used in candles, waxed paper, packaging, cosmetics, and polishes.

AdBlue

A high-purity urea solution used in modern diesel engines with Selective Catalytic Reduction (SCR) systems to reduce harmful nitrogen oxide (NOx) emissions.

PETROCHEMICAL PRODUCTS

We supply key intermediates and industrial chemicals that are fundamental building blocks for consumer goods and industrial applications.

LABSA (Linear Alkylbenzene Sulfonic Acid)

A key synthetic surfactant and one of the most important raw materials for the detergent industry, used in washing powders, soaps, and cleaning liquids.

Formaldehyde

A foundational chemical building block used in the production of resins, particleboard, plywood, and various other industrial chemicals and materials.

Anhydrous Ammonia

A highly concentrated form of ammonia used as a key component in the production of nitrogen fertilizers and as a building block for many industrial and pharmaceutical chemicals.

CHEMICAL PRODUCTS

We supply key industrial chemicals that are integral to manufacturing, water treatment, and food processing, all meeting rigorous safety and quality standards.

Sulfuric Acid

One of the most widely produced industrial chemicals in the world, used extensively in fertilizer manufacturing, chemical synthesis, wastewater processing, and oil refining.

Hydrochloric Acid

A strong corrosive acid used for steel pickling, oil well acidizing, food manufacturing, and producing calcium chloride and other inorganic compounds.

Calcium Chloride

A salt that is highly effective for de-icing roads, dust control, and as a brine in refrigeration plants and food production.

Phosphoric Acid

A versatile acid used primarily in the production of phosphate fertilizers, as well as in food and beverage additives, rust removal, and dental applications.

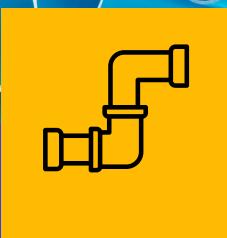

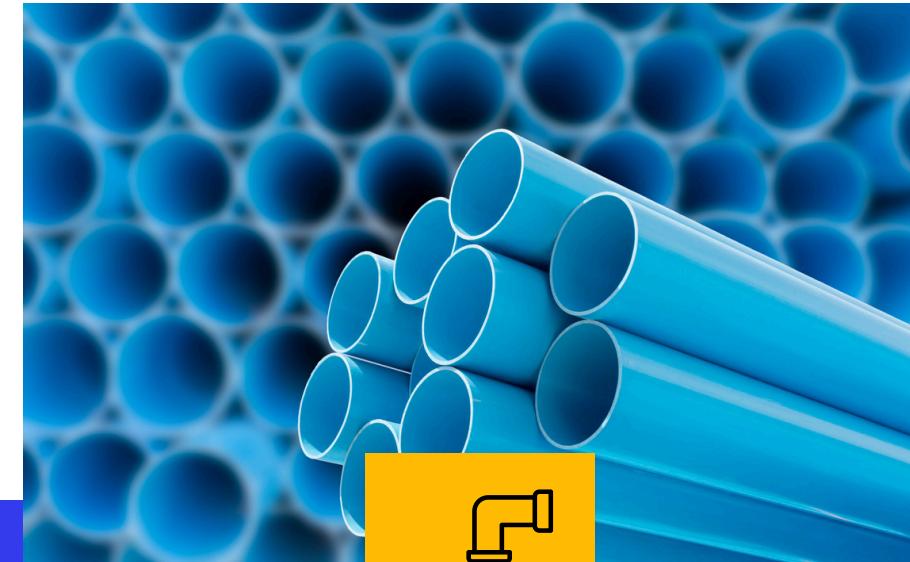

POLYMER PRODUCTS

Our extensive range of polymers provides the raw materials for countless applications, from durable packaging and construction materials to automotive parts and consumer products.

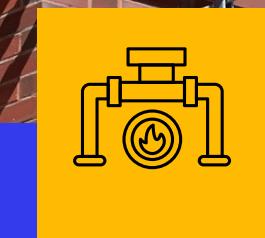

Polypropylene (PP)

A highly versatile and durable thermoplastic polymer used in packaging, textiles, automotive components, and a wide variety of plastic parts.

Polyvinyl Chloride (PVC)

widely used synthetic plastic polymer known for its durability and versatility, common in construction for pipes, window frames, flooring, and electrical cable insulation.

MDPE (Medium-Density Polyethylene)

A type of polyethylene known for its good shock and drop resistance, commonly used for gas pipes, sacks, and packaging film.

POLYMER PRODUCTS

Our extensive range of polymers provides the raw materials for countless applications, from durable packaging and construction materials to automotive parts and consumer products.

HDPE (High-Density Polyethylene)

A robust thermoplastic known for its high strength-to-density ratio, used for milk jugs, detergent bottles, piping, and plastic lumber.

LLDP (Linear Low-Density Polyethylene)

A flexible and puncture-resistant polyethylene commonly used for plastic films in packaging, such as stretch wrap, and for various container lids.

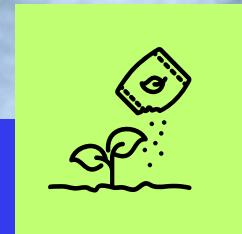

Polymer Ethylene

A broad category of the world's most common plastic, encompassing various densities (like HDPE, MDPE, LLDP) used in countless applications from films to rigid containers.

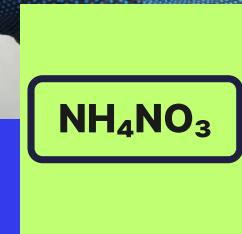

FERTILIZERS PRODUCTS

Supporting global food security is a core part of our mission. We supply a comprehensive portfolio of high-efficacy fertilizers that enhance crop yields and promote sustainable agriculture worldwide.

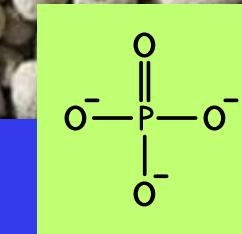

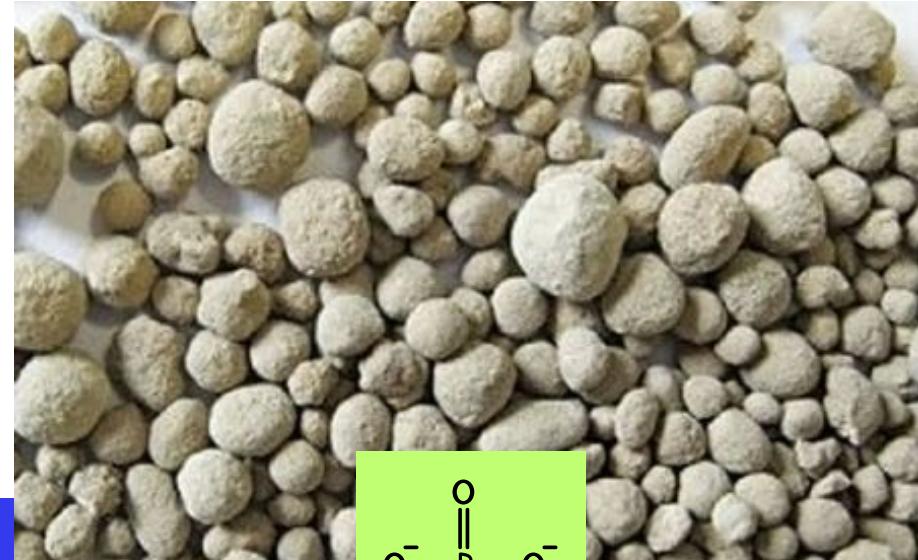

Urea 46%

A highly concentrated solid nitrogen fertilizer, providing 46% nitrogen content, making it the most common nitrogen source for broad-acre crops globally.

Ammonium Nitrate

A versatile fertilizer that supplies nitrogen in both ammonium and nitrate forms, providing readily available nutrients for plant uptake.

Rock Phosphate

A natural mineral source of phosphorus, a key macronutrient for plant growth, used for direct application or to produce other phosphate fertilizers.

FERTILIZERS PRODUCTS

Supporting global food security is a core part of our mission. We supply a comprehensive portfolio of high-efficacy fertilizers that enhance crop yields and promote sustainable agriculture worldwide.

NPK Blends

Balanced, multi-nutrient fertilizers containing varying proportions of Nitrogen (N), Phosphorus (P), and Potassium (K) to meet specific crop and soil requirements.

Ammonium Sulphate

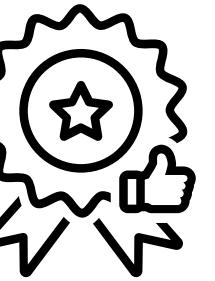

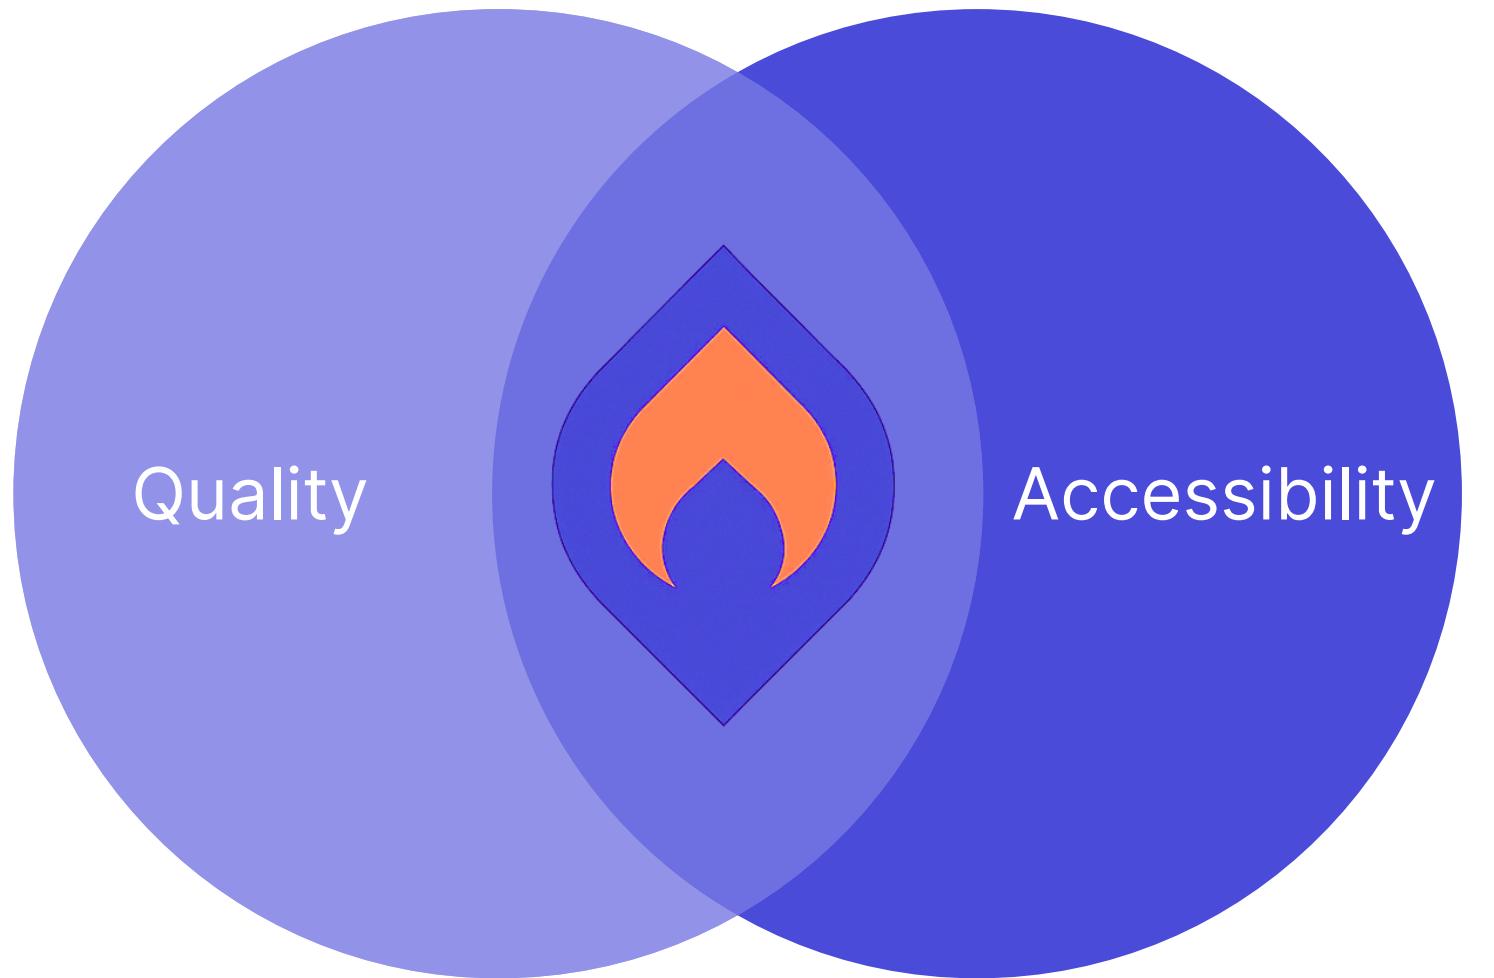

An excellent source of both nitrogen and sulphur, particularly beneficial for alkaline soils and crops with high sulphur demands like canola and alfalfa.

DAP (Di-Ammonium Phosphate)

The world's most widely used phosphorus fertilizer, containing both nitrogen and phosphorus, making it a highly effective nutrient source for a wide range of crops.

Quality & Global Logistics

Commitment to Quality

Quality is the principle that governs our operations. We implement stringent control protocols, from supplier vetting to final delivery, to ensure every product meets or exceeds international specifications. We partner only with reputable producers and leverage independent inspections to guarantee the integrity of our portfolio.

Commitment to Logistics

An exceptional product is only as good as its delivery. Our in-house logistics team possesses deep expertise in managing complex global supply chains. We orchestrate every detail of transportation to ensure safe, efficient, and timely delivery, providing our clients with a seamless, end-to-end procurement experience.

Global Presence

Petrovanta's operational strength is amplified by our strategic global positioning. Our headquarters in **Dubai, UAE**, places us at the crossroads of international trade, while our **European office in Frankfurt**, Germany, is a vital hub for our operations in Europe and the Americas. This dual-hub strategy allows us to create a seamless and efficient global supply chain, ensuring reliable delivery to any port in the world.

CONTACT

We welcome the opportunity to discuss your specific commodity needs. Our teams in Dubai and Frankfurt are ready to provide you with expert advice and tailored solutions.
